DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Eyraier (5,722,685).

Eyraier discloses an airbag apparatus comprising an airbag having an occupant-side-surface facing the occupant and a vehicle-body-side surface opposite to the occupant-side surface when the airbag is inflated, and an upper chamber 28 and a lower chamber 26 separated from each other; a gas generator 12; a communicating portion between the upper and lower chambers; and a check valve 24. Eyraier teaches the occupant-side-surface and the vehicle-body-side surface are joined at peripheries thereof. Eyraier teaches a gas distributor formed of a sheet wrapping around the gas generator. As shown in figures 2 and 3, the gas distributor is formed of the sheet rolled in a cylindrical shape with edges overlapped and the gas generator is fixed with a mounting member passing through the edges. A bent unit 30 is formed in the upper chamber.

Allowable Subject Matter

3. Claims 8-13 are allowed.
